

Annual Summer School in Molecular Biophysics and Systems Biology

Organized by the Center for Nanobiology and Structural Biology

Supported by The Institute of Microbiology (Czech Academy of Sciences), National research infrastructure project C4SYS, University of South Bohemia, and the Visegrad Fund

Venue: Nove Hrad, South Bohemia, Czech Republic

July 11 – August 6, 2016

Center for Nanobiology and Structural Biology

The Annual Summer School in Molecular Biophysics and Systems Biology gives university students from the Czech Republic and abroad an opportunity to gain experience in a diverse range of scientific fields and techniques, through working on real scientific problems, attending lectures, and socializing with other students and researchers. Summer school participants work in a highly international environment, in laboratories equipped with state-of-the-art scientific instruments. The lectures are given by leading scientists from the Czech Republic, Germany and USA.

Venue: housing and laboratory spaces are within the Nove Hrad chateau, situated in a beautiful South Bohemia region of the Czech Republic.

Who is eligible: Bachelor and Master students with interest in Molecular biology and Biophysics. For those interested, the summer school provides an opportunity to join a Ph.D. program afterwards.

The scientific program is complemented by social activities, including cycling, hiking and rafting on the picturesque Vltava river.

Working language of the school is English.

Invitations for Schengen visa and certificates of attendance are provided.

Accommodation is provided free of charge.
